Outlook for SW Colorado

Fire
Fire size is 35,195 acres at 36% containment. Moderate fire behavior is expected today moving into extreme conditions tomorrow. Firing operations (to protect nearby residential areas) will continue today.

Smoke
Smoke will continue to impact downwind communities along the Animas River drainage late this afternoon and overnight. Clearing is expected by late tomorrow morning in these communities.

Air Quality Index (AQI) | Actions to Protect Yourself
--- | ---
Good | None
Moderate | Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
USG | People within Sensitive Groups* should reduce prolonged or heavy outdoor exertion.
Unhealthy | People within Sensitive Groups* should avoid all physical outdoor activity.
Very Unhealthy | Everyone should avoid prolonged or heavy exertion.
Hazardous | Everyone should avoid any outdoor activity.

Disclaimer: Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.
