The 416 Fire continued to move to the north today in the Elk Creek Drainage. The fire is currently 37% contained with 359 assigned personnel.

Here's a summary of Facebook posts throughout the day.

- Crews are beginning to do re-assessments along the 550 corridor. (4:50 pm)
- Hand firing operations began earlier this afternoon. (3:36 pm)
- We will continue to post the daily Air Resource Smoke Reports as well as the information coming from the San Juan Basin Public Health. (2:14 pm)
- We are again in a Red Flag Warnings today. (1:06 pm)
- While the response from the community has been overwhelmingly positive, there have been some questions about why we haven't just "put the fire out." Here is our response. (10:32 am)
- Smoke PSA (9:56 am)
- The fire has NOT crossed 171 road to the West. The only spots yesterday were across the hand lines and were all picked up by the firefighters. (9:29 am)
- 416 Fire Morning Update (7:34 am)
- The 416 Fire grew 4,129 acres yesterday, the largest areas of growth occurred to the west and north this period. The largest areas of growth occurred in the NW section of the heat perimeter. (5:31 am)
